Unlock Innovation with Sonata AWS Services.

Transformation-focused companies require a cloud-first approach. They need an AWS partner who can envision, engineer, and evolve their bespoke digital strategy. Sonata AWS services ensure large enterprises, start-ups, and industry leaders achieve it with ease.

Sonata is an AWS Advanced Partner known to create best-in-class user experiences, innovative business applications, and data platforms built on cloud infrastructure for its clients.

Our unique **Platformation™** approach helps global clients create a flexible digital infrastructure that meets the goals of a digital business, giving them the ability to scale to change with speed.

An expert AWS full-stack service provider, Sonata accelerates cloud adoption through comprehensive frameworks, digital process libraries, accelerators, and IPs.
